Product Overview

Excel Category 5e Through Coupler Patch Panels offers RJ45 to RJ45 jack connectivity between the front and rear of the patch panel. The patch panel is ideal for providing a cross connect for network equipment with the simple fitting of patch cords rather than switch link looms.

Each panel has the port number screen printed below the port with an area to add the port identification above. The design lends itself for the easy application of a bespoke engraved label above and below the ports to suit the installation requirement. Cage nuts and machine screws are included with each panel.
