Product Overview

The Excel Enbeam splice tray conversion kit has been designed to allow the Environ 100-651 enclosure to be converted into a fibre optic splice enclosure by simply changing the internal fixing plate. With two options of kits available - 48 fibre 200-128 and 240 fibre 200-129 - allows the enclosure to be adapted to part-copper and part-fibre using the 200-128 or gives a full fibre option using the 200-129. Both kits can also be installed onto any back plate via the fixing holes. This also allows splice trays to be mounted in multiple applications and expanded as required.
