## Product Overview

The Excel range of LC patch panels are sliding drawer ?tray-style? housings suitable for either direct termination or splicing of up to 96 fibres (48 using SC duplex or 96 when using LC quad connections) in a 1U space. Each panel is manufactured from a mix of 1 mm thick steel with a powder-coated finish and a high-density polycarbonate sliding tray, offering a lightweight, strong, durable unit. To the front of the patch panel, the specified number of duplex/quad adaptors are loaded from left to right. Each panel utilises colour-coded adaptors: beige, aqua and violet for multimode, blue for single mode, and green for single-mode APC. This design delivers lower emissions and less reliance on mineral extraction, while achieving a 36% decrease in embedded carbon compared with the metal version. The lighter construction also minimises floor loading during installation and decreases the overall cabinet weight, improving handling and installation efficiency....
