

- ✕ Magnetic base
- ✕ No fixing hardware required
- ✕ 25 Year system warranty

Product Overview

Enbeam magnetic cable management set is used to ensure patching cables are uniformly installed and controlled into a fibre panel. These management pieces are designed to work with and are an ideal accessory for the cassette panel.

The intuitive design means that fitting is simple and pressure on any installed cables is never more than needed as the units slide along the panel to create the perfect sweep within the fibre.

These management ladders have 6 sections in each unit to allow for 2 leads in each section to ensure that future adds, moves and changes can easily be performed.

Product Specifications

| Feature | Values |
|-------------------------------|-------------------------|
| Model | Fibre optic cable guide |
