Product Overview

The Enbeam 96 Fibre Splice Enclosure has been designed to allow up to 96 fibres to be spliced and housed within an IP68 rated durable enclosure, which is ideal for harsh environment applications. The enclosure is mechanically sealed via compression glands to allow re-entry without compromising the integrity of the unit.

The enclosures can be mounted in several ways using different mounting brackets (see additional mounting options); wall, pit, pole and aerial. The enclosure can be expanded to take up to 144 fibres by increasing the number of trays or to add different splice tray options for Splitters or different fibre counts per tray (see additional tray options).
