Product Overview

Enbeam duct installable blowing tubes have been designed for direct installation into existing ducts to allow blown fibre to be distributed externally. All tube bundles are over-sheathed with High Density Polyethylene (HDPE) to withstand the friction when installing the micro ducts.

All internal tubes are colour coded for easy identification and have a low friction inner coating to reduce drag & maximise blowing distances. Tubes are easily broken out of the main sheath and can be branched-off using the Enbeam push-fit blown tube connectors. The tubes are supplied on disposable wooden drums and capped at both ends to prevent ingress of moisture or contamination.
