Product Overview

Enbeam Internal blowing tubes have been designed to allow blown fibre to be distributed internally. The internal grade tubes are over-sheathed with Polyethylene and Halogen free (HF) flame retardant material. All internal tubes are colour coded for easy identification and have a low friction inner coating to reduce drag & maximise blowing distances.

Tubes are easily broken out of the main sheath and can be branched-off using the Enbeam push-fit blown tube connectors. The tubes are supplied on disposable wooden drums and capped at both ends to prevent ingress of moisture or contamination.
