Product Overview

Enbeam external blowing tubes have been designed to allow blown fibre to be distributed externally and within ducts. The external grade tubes are over-sheathed with High Density Polyethylene (HDPE). The tubes have a low friction inner coating to reduce drag & maximise blowing distances.

The compact tubes can accommodate Excel fibre units containing from 2 to 12 fibres and are colour-coded for identification.

The tubes are easy to terminate and branch-off using suitable Excel connection closures and push-fit connectors.

The tubes are supplied on disposable wooden drums and capped at both ends to prevent ingress of moisture or contamination.
