## Product Overview

Enbeam OM4 Multimode Blown Fibre EPFU Loose Tube 4 Fibre 50/125 Yellow, part of a huge range of OM4 fibre optic cables fully stocked at Mayflex.

Enbeam Enhanced Performance Fibre Units (EPFU) are designed specifically for blown-fibre applications and are optimised for installation within our range of blown-fibre tubes.

The fibres are contained within a soft acrylate layer which cushions the fibres. This layer is coated with a hard layer for strength and finally a low-friction coating to ensure low drag and maximise blowing distances within the tubes.

The acrylate coatings are easy to remove to expose the 250-micron primary-coated fibres for quick splicing.

The fibres are colour-coded according to TIA-598-C.
