Product Overview

Excel OM5 50/125 µm loose tube optical fibre cables have been designed specifically for internal and external applications. These compact, lightweight cables are extremely flexible and are quick and easy to install. The cables are constructed around a gel free tube containing up to 24 colour coded 250 µm primary coated fibres. This tube is covered with an E-glass strength member. The print legend on the cable now includes information regarding the DOP number, test and classification of the cable for traceability.
