Product Overview

The Excel INT1 Intelligent PDU is a UK-manufactured energy monitoring PDU that provides local and remote overall power monitoring with high accuracy. Offered in various configurations, the INT1 comes standard with C13 and C19 sockets powered by EN60309 Com16 or Com32 plugs, in single or three-phase options. The INT1 offers flexibility with a maximum of 48 sockets. Standard options include C13, C19, UK, UK left-angled and right-angled, and Schuko socket types.

The INT1 features environmental ports for temperature, humidity sensors, water detection rope, or door sensors. It can also integrate with electronic access control handles for your data centre racks. For larger deployments, daisy-chain up to 32 devices using a single master PDU with a single IP address. The included free software allows remote monitoring via a user-friendly HTML browser with secure login.

The INT1 features an RGB backlit LCD display for real-time power usage across all connected devices. Additionally, configure SNMP and email alerts for critical parameters like voltage, current, power factor, and internal temperature. With over 1% accuracy, the INT1 measures RMS volts, amps, kilowatts, frequency, power factor, internal PDU temperature, peak volts and amps, kVA, and kWh.
