## Main Features

- / Designated splitter area
- / Accepts LC quad or SC duplex flangless adaptors
- / UL 94 V-0
- / IP56 rated
- / Internal/external
- / RoHS compliant

## Product Overview

The Encasa range of fibre distribution points have been designed to fit within the FTTx network. These enclosures can be aerial or wall mounted. Made from 100% virgin UL 94 V-0 rated material, UV stable and are IP56 rated, allowing them to be used in both internal and external applications. This Encasa fibre distribution point accommodates 16 fibres (using LC connections) or 8 fibres (using SC connections). Flexibility is increased through the option to use the enclosure for traditional splicing of cables with a capacity of 24 fibres and the installation of pre-terminated cables via the split gland cable exit points that accept both flat and round cable. The use of splitters is also possible with mounting positions for up to 4 units found on the underside of the adaptor tray. Blown fibre installations can also be accommodated, with a dedicated gas seal holder housed within the cable storage area...
